

SCIENCE INTERNATIONAL

Specialisation

Science International combines a Science major with study to 300 Level in Chinese, French, German, Japanese or Spanish. Science graduates who are familiar with the language and customs of other countries are of particular value to export-oriented industries with a technological base.

Note(s): You should consult the relevant language department to determine your language entry level. Due to timetable constraints, it may not be possible to take all combinations of each science with each language.

Science International is available as a specialisation alongside any major subject for the Bachelor of Science or Bachelor of Science (Technology) degrees.
